Training Programme

Objectives

We all dream of an education system that can serve our children, ignite the love of learning, use the best talents of our teachers and others to create results that matter for our societies. Students who love learning will stay at schools. Participatory Learning Methodologies offer educators a new way to HOST learning and CREATE learning communities. Over the course of this 2-day training, we will learn and practice the participatory learning methodologies that include World Café, Appreciative inquiry, Circle Practice and powerful questions. By experiencing the main tools of participatory learning (www.artofhosting.org) participants will get the necessary skills for building a community of practice to reawaken the love of learning and the belief that education is an important factor of lifelong success and satisfaction.

The main goal of the course is to help teachers to engage students by participatory learning. Throughout the course, participants will get familiar with the impact they can have on students by their active involvement. They will learn how to build social capital that increase social and emotional learning.

Methodology

The course is designed as an interactive process with emphasis on establishing a learning community between participants and trainers. The focus is on experiential learning inspired by the Art of Hosting Conversations That Matter methodology. The participants will also receive a workbook with sessions' summaries, and descriptions of activities used. Resources to deepen understanding and practice will be shared for further study.
